# CHINA★AFRICA RESEARCH INITIATIVE

NO. 01 / 2014

**POLICY BRIEF**

**THE POLITICAL ECOLOGY OF CHINESE AGRICULTURE INVESTMENT IN UGANDA:  
THE CASE OF HANHE FARM** BY JOSH MAYO

JOSH MAYO is a PhD Research Fellow at the YU University Amsterdam, and a Research Fellow at the Mawenzi University Institute of Social Research in Kampala, Uganda.

This brief reports initial research results from the SAIS-CARI conference, "Agricultural Assessment in Africa: Trade or Friendship? Part II" held on May 16 and 17, 2014.

This conference was made possible through funding from Johns Hopkins SAIS and the Smith Richardson Foundation.

The JOHN HOPKINS SAIS CHINA-AFRICA RESEARCH INITIATIVE (SAINS-CARI) was launched in 2010 as a process-oriented research programme that aims to promote a better understanding of the economic relations between China and Africa. It focuses on the role of Chinese companies in Africa's development, their impact on local economies, and their contribution to regional development and collaboration.

[HTTP://SAIS-CARI.org/](http://SAIS-CARI.org/)

**SAINS-CARI** POLICY BRIEF NO. 01 / OCTOBER 2014 1

Hanhe Farm, located in the Nakaseke Administrative District, is the first private Chinese land-based agriculture enterprise in Uganda. This case can be used to examine the political context of land acquisition in Uganda, the ecological impact of land-use changes, and local community experiences and responses to conflicts over access to land and protection of ecological rights. The research findings demonstrate how the political and economic interests of international and national elite converge through formal and informal networks to access resources in violation of local communities' social and ecological rights. It highlights governance failures that perpetuate ecological destruction, entrench power imbalances, and promote marginalization of local communities.

Chinese engagement in Uganda, as in other parts of Africa, has been portrayed as an aggressive and exploitative plunders of resources that has adverse socio-ecological consequences. Despite these misgivings, Uganda has actively courted Chinese investment in its agriculture sector. Uganda's agriculture minister has openly invited Chinese farmers to acquire "abundant" land in Uganda to grow crops for export.

The government of Uganda has identified agriculture as the main driver for economic growth, poverty reduction, and overall development. Local poverty is understood to result largely from poor agricultural productivity associated with traditional smallholder farming practices. Commercial-oriented agriculture reform is thus presented as the solution to rural poverty. The drive toward large-scale commercialized agriculture is aligned with the country's wider strategy of attracting foreign direct investment (FDI) to spur overall economic growth.

Uganda's state-driven agriculture reform program—the Plan for Modernization of Agriculture—designed to the extent of an insulating global rush for farmland, policy drivers agricultural commercialization and capital commercial investments in agriculture led Uganda to become one of the prime targets for a new wave of "land-grabs." China in particular stands out as one of the main culprits.

To date, no systematic studies have been conducted on the scale, patterns, and effects of Chinese agriculture engagement in Uganda. Research on Chinese companies in Kampala shows that, while investments in oil and gas, manufacturing, infrastructure, telecommunications, and trade are the rise, agriculture sector investment is still low.

**SAINS-CARI** POLICY BRIEF NO. 01 / OCTOBER 2014 2

discussions were conducted with a total of 22 farmers drawn from the community around Hanhe Farm. Additionally, extensive life histories and in-depth interviews were conducted with three Chinese and five local staff at Hanhe Farm.

**SAINS-CARI** POLICY BRIEF NO. 01 / OCTOBER 2014 3

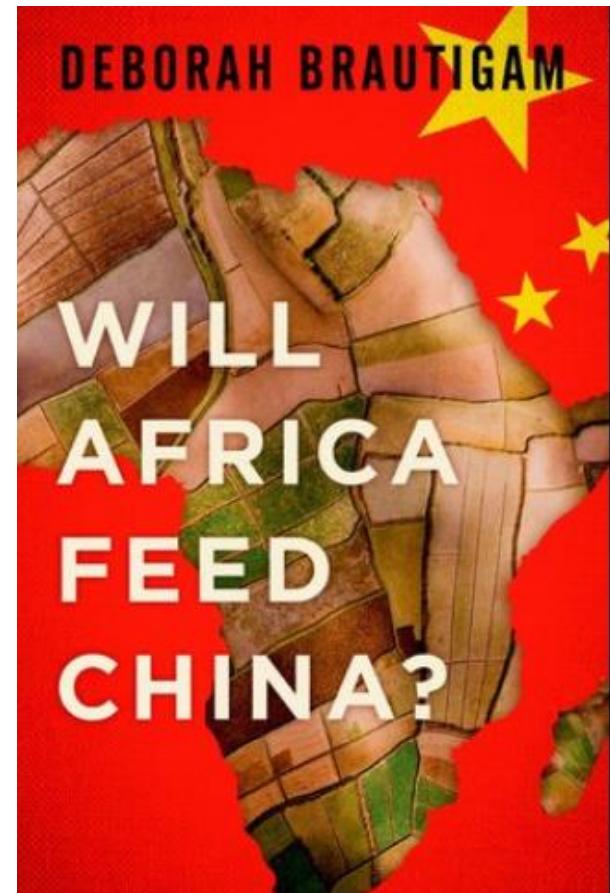

the version.

▪ Hanhe Farm's parent company, Hebei Agricultural Science and Technology Co. Ltd., has been accused of fraud in China. Investors have charged the company with misappropriating its land holdings in Uganda as more extensive than they actually are.

## Proof of concept: Chinese aid in the Pacific map

In 2015, the Lowy Institute launched the Chinese Aid in the Pacific map.

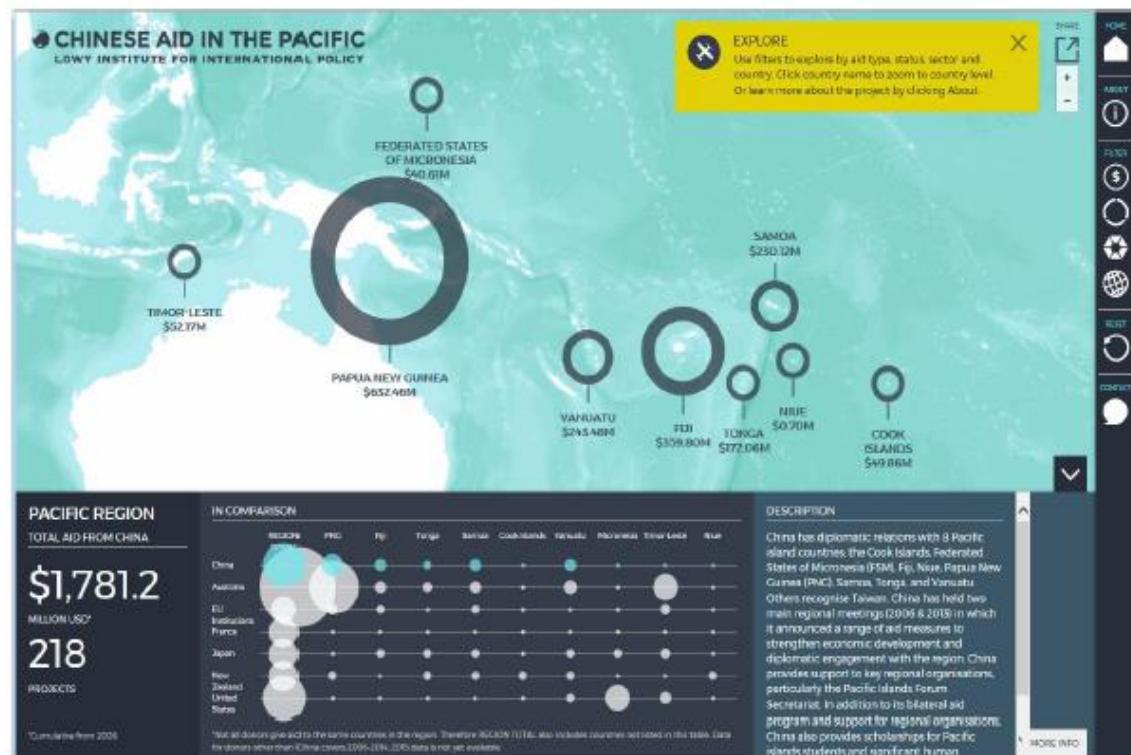

This project provided information about Chinese-funded aid projects in the Pacific region from 2006 onwards. It covered the 8 countries with which China has diplomatic relations.

The results of the Pacific aid in the Pacific map project are available on:

<https://www.lowyinstitute.org/chinese-aid-map/>

An update was made to the Chinese aid in the Pacific map in 2016.

The **Pacific Aid Map** is intended to improve and build upon the Chinese aid in the Pacific map. It will account for all multilateral and bilateral donors from around the world.

China's concessional loans to Tonga have been rescheduled in 2014

A concessional loan of RMB 440 million (US\$72 million) for reconstruction of the Nuku'alofa central business district in 2008 and another one of RMB 291 million (US\$48 million) for road construction and rehabilitation in 2010 have been rescheduled with Amendment Agreements signed in June 2014. However, with this temporary relief, that it will cost more for GoT in future years. Unless, PRC will consider favourable cancellation of a portion of this outstanding debt (if not all).

# China Eximbank's loans to Djibouti

	Total amount, US\$ million	Grant element, percent	Disbursement period	Creditor	Currency
Ethiopia-Djibouti railway	538	-9.9	2014-16	China EximBank	USD
Ethiopia waterpipeline	322	29.7	2015-17	China EximBank	USD
Port de Goubet	70	26.3	2013-16	China EximBank	CNY

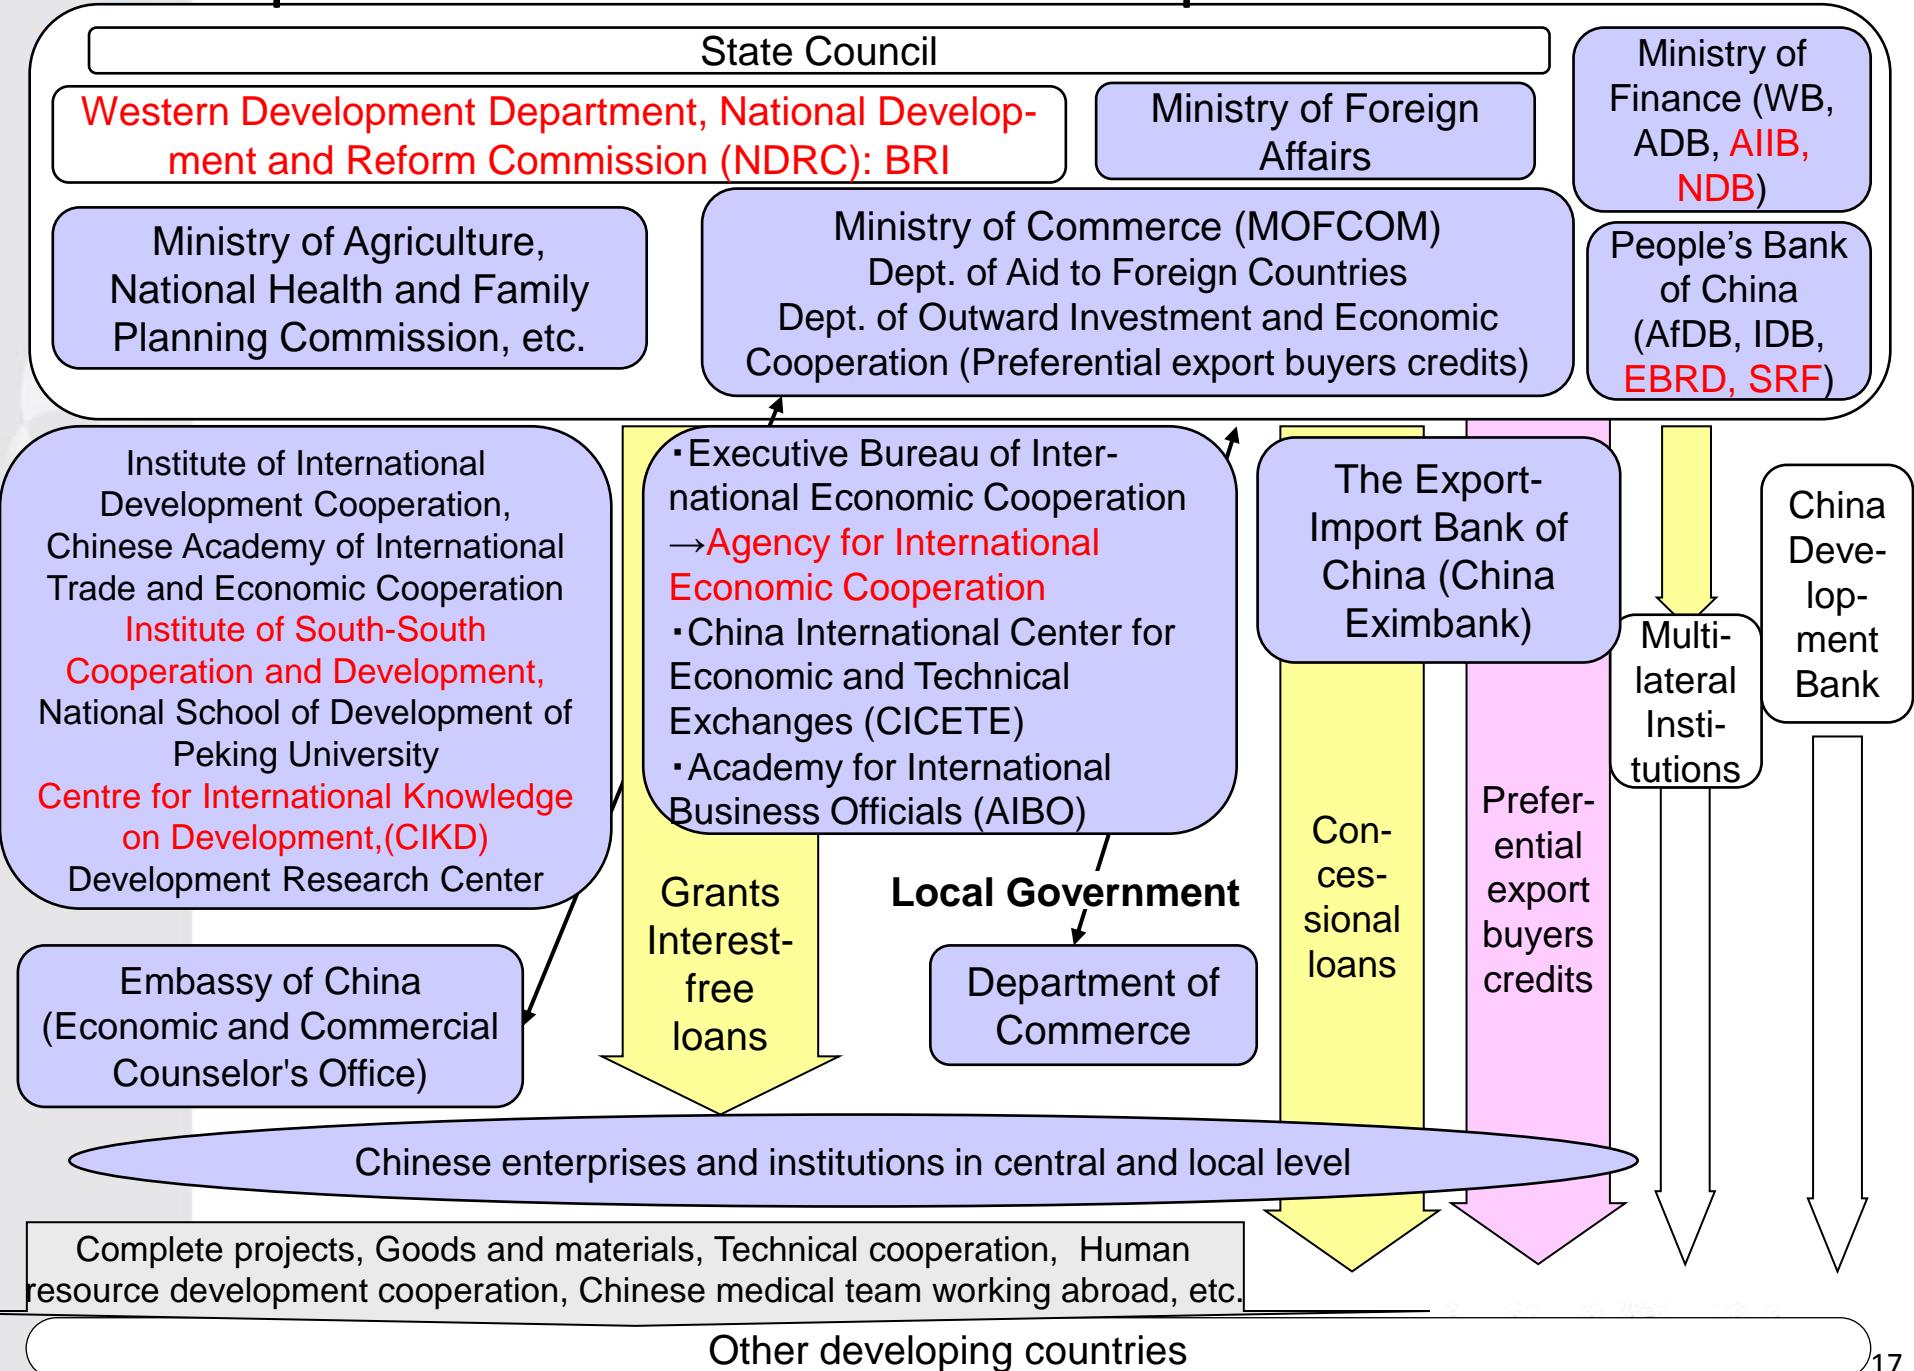

b.PV of debt-to GDP ratio

The ongoing debt-financed investment boom will boost economic growth, but also aggravates Djibouti's high risk of debt distress, raising concerns for fiscal sustainability.

## **China's implementation structure for economic cooperation**

**Central Government**

# Launching Ceremony of CIKD on 21 Aug 2017

(CIKD: China Center for International Knowledge on Development)

# China released national plan for implementation of UN sustainable development agenda in Sept. 2016

## Table of Contents Preamble

I. Achievements and Experience in China's Implementation of the MDGs

1. Major Achievements 2. Development Experience

II. Opportunities and Challenges in China' Implementation of the 2030 Agenda for Sustainable Development

III. Guiding Thoughts and General Principles for China's Implementation of the 2030 Agenda 1. Guiding Thoughts 2. General Principles

IV. Overall Approaches for China's Implementation of the 2030 Agenda for Sustainable Development

1. Synergy of Strategies “Outline of the 13th Five-Year Plan contained a commitment to the “active implementation of the 2030 Agenda”” “bringing the development objectives of local governments in line with the 2030 Agenda” “advancing the “Belt and Road” Initiative in a way that will facilitate the implementation of the 2030 Agenda in countries along the two routes”

2. Institutional Guarantee 3. Social Mobilization 4. Resource Input 5. Risk Management 6. International Cooperation 7. Oversight and Review

V. Implementation Plan for the 17 Sustainable Development Goals
