

## Part III. Concluding Remarks

Based on macro and micro investigation presented above, following concluding remarks might be reached:

- More and more wastewater treatment facilities have been installing as a result of stricter enforcement of environment policy;
- There will be an increasing demands for wastewater treatment facilities, and the market volume is great;
- Most of the facilities and equipment are made domestically;
- There are significant technological deficiencies and drawbacks in the existing installations;
- Enterprise own fund is the major financing source for wastewater treatment facilities and equipment;
- There is a great potential for International Cooperation; and
- The promising International cooperation area: technology transfer
