ACKNOWLEDGEMENTS	iii
ACRONYMS	viii
COUNTRY ABBREVIATIONS	viii
FOREWORD	ix
EXECUTIVE SUMMARY	1
1. ANALYSIS OF REJECTIONS OF ASIAN AGRIFOOD EXPORTS TO GLOBAL MARKETS	7
1.1 Introduction	8
1.2 Trends in agricultural and food product exports from East Asia	10
1.3 General trends in import rejections of East Asian agri-food products	13
1.4 Performance of Asian countries in the major markets	15
1.5 Potential pitfalls along the supply chain	21
2. ANALYSIS OF JAPANESE IMPORT REJECTIONS OF ASIAN AGRIFOOD PRODUCTS	25
2.1 Imported food safety inspection system in Japan	25
2.2 General trends in import rejections of agri-food products at Japanese ports	26
2.2.1 Overview of rejected products	27
2.2.2 Reasons for rejections	31
2.2.3 Selected focus on China, Viet Nam, and Thailand	33
3. CASE STUDY: CHINESE FROZEN VEGETABLE EXPORTS	37
3.1 Introduction	37
3.2 Production and distribution of vegetables in China	39
3.2.1 Domestic production of vegetables	39
3.2.2 Vegetable distribution system in China for the domestic and global markets	40
3.3 Exports of Chinese vegetable products	42
3.3.1 The distribution of major importing countries for Chinese vegetable products	43
3.4 Supply chain management by multinational corporations	45
3.5 Conclusions and policy implications	46
4. CASE STUDY: CHINESE EEL EXPORTS	49
4.1 Introduction	49
4.2 Trends in trade in live and processed eels	50
4.2.1 Trends in exports of live eels from China	50
4.2.2 Trends in exports of processed eels from China	51
4.3 Import rejections by Japan and underlying reasons for rejections	52
4.3.1 Live eels	52
4.3.2 Processed eels	53
4.3.3 Summary	53
4.4 Eel production in China	53
4.4.1 Moving locations of main production sites	53
4.4.2 The characteristics of eel production in China	53
4.4.3 The schedule of eel culture	54
4.5 Case study of Firm Y	54
4.5.1 Production process	54
4.5.2 Manufacture and export of processed eels	55
4.5.3 Inspections of eels	56

Table of Contents

4.5.4	Inspection of growing ponds by the Chinese government	58
4.5.5	Investments in inspection and testing infrastructure	59
4.5.6	Traceability	59
4.5.7	The causes of residues of agricultural chemicals and drugs	59
4.6	Case study of Firm T	60
4.6.1	Distribution of eels	60
4.6.2	The quality control problem from the perspective of middlemen	60
4.7	Conclusions and policy implications	61
5.	CASE STUDY: VIETNAMESE FROZEN PANGASIVUS AND SHRIMP EXPORTS	63
5.1	Introduction	63
5.2	History and current trends	65
5.2.1	Overview of the seafood sector in Viet Nam	65
5.2.2	History of and trends in the <i>pangasius</i> industry	70
5.2.3	History of and trends in the shrimp industry	71
5.3	<i>Pangasius</i> value chain and production process	73
5.3.1	<i>Pangasius</i> value chain	73
5.3.2	<i>Pangasius</i> production process	74
5.4	Shrimp value chain and production process	76
5.4.1	Shrimp value chain	76
5.4.2	Shrimp production processes	77
5.5	Compliance with what standards is required by importing countries?	77
5.5.1	What measures are taken in Viet Nam?	80
5.5.2	Observed effects of standards on stakeholders along the value chains	81
5.6	Major issues in import standards compliance	82
5.6.1	Inadequate incentive mechanisms to comply with standards/certificates	82
5.6.2	Weak control of upstream market	83
5.6.3	Still room for non-compliance	83
5.7	Conclusions and policy implications	84
6.	CONCLUSION	85
7.	REFERENCES	87
8.	ANNEXES	91
Annex A:	Contextualizing trade-related standards	91
Annex B:	Overview of Agricultural and Food Exports from East Asia	94
Annex C:	Cambodia	95
Annex D:	China (including Hong Kong)	97
Annex E:	Indonesia	99
Annex F:	Malaysia	103
Annex G:	Myanmar	105
Annex H:	Philippines	107
Annex I:	Republic of Korea	110
Annex J:	Singapore	113
Annex K:	Thailand	115
Annex L:	Viet Nam	118
